PROFESSIONAL SUMMARY

Senior Software Engineer & Aspiring Product Manager with over 5 years of experience architecting and optimizing core technical solutions for a leading scale logistics and supply chain network at Delhivery. Proven track record of spearheading product discovery, defining performance KPIs, and collaborating closely with cross-functional stakeholders—including Operations, Customer Support, and Core Engineering teams—to transform highly complex operational bottlenecks into highly scalable workflows. Expertly leverages deep technical expertise in microservices and distributed systems alongside strong product analytics to make user-centric, data-driven prioritization decisions that optimize system health, eliminate revenue leakage, and significantly improve user experience.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Delhivery Pvt. Ltd.

June 2025 - Present | Gurgaon, India

- **Cross-Functional Leadership:** Collaborate closely with Operations, Customer Support, and Engineering teams to conduct product discovery, map operational bottlenecks, and enhance shipment visibility across the entire logistics lifecycle.
- **Product Lifecycle Management:** Spearhead technical requirement analysis, feature prioritization, and solution design discussions for business-critical logistics services, ensuring optimal platform scalability.
- **Data-Driven Discovery:** Analyze complex field operational challenges to propose and scope technology-driven workflow changes, maximizing processing efficiency and system uptime.
- **Delivery & GTM Planning:** Partner with cross-functional stakeholders on delivery planning, sprint execution tracking, and successful incremental feature rollouts to eliminate deployment friction.

Software Engineer | Delhivery Pvt. Ltd.

November 2021 - June 2025 | Gurgaon, India

- **Product Ownership & Workflow Optimization:** Owned and managed the discovery and product lifecycle of core logistics systems supporting route-wise bagging, shipment charge tracking, and automated SMS notification services.
- **Route-Wise Bag Mapping:** Scoped, prioritized, and built the Route-Wise Bag Mapping application, optimizing complex shipment routing workflows and successfully reducing overall shipment delays by **25%**.
- **Revenue Recovery Strategy:** Identified revenue leakages by performing deep data-driven analysis; designed and launched a shipment charge tracking system that drastically improved financial transparency and enabled automated recovery of previously untracked costs.
- **Requirement Gathering & UX Improvement:** Partnered directly with EMS and Customer Support teams to gather requirements, write detailed user stories, and launch waybill exception management workflows, reducing manual operational intervention by **35%**.
- **Feature Prioritization & Optimization:** Led feature enhancements for core shipment visibility and Multi-Package Shipment (MPS) workflows, reducing manual package scanning errors by **20%** through optimized application flows.
- **Customer Engagement Automation:** Conceptualized and deployed core SMS communication microservices, significantly improving automated shipment lifecycle notifications and reducing failed delivery attempts.

QA Engineer | Delhivery Pvt. Ltd.

April 2021 - November 2021 | Gurgaon, India

- **Quality Assurance & Alignment:** Collaborated tightly with product management and engineering squads to validate high-priority business requirements against user acceptance criteria, ensuring resilient feature quality.
- **Agile Methodologies:** Actively engaged in sprint planning, retrospective ceremonies, and requirement refinement discussions to align cross-functional engineering deliverables with overarching product milestones.

CORE SKILLS & COMPETENCIES

Product Management	Requirement Gathering & Analysis, User Story Writing, Backlog Management, Agile/ Scrum, Feature Prioritization, Product Lifecycle Management (PLM), Stakeholder Management, Workflow Optimization, KPI Tracking, Cross-Functional Collaboration
AI & Data Analytics	Product Analytics, Root Cause Analysis, Data-Driven Decision Making, Generative AI (GenAI), Google Gemini, Claude AI, Optical Character Recognition (OCR), Cursor AI
Technical Infrastructure	Python, Java, JavaScript, Django, Flask, Angular, Microservices Architecture, Distributed Systems, High-Scale System Design, Low-Level Design (LLD), Design Patterns, SQL, MongoDB, NoSQL
Cloud, DevOps & Streaming	AWS (Lambda, API Gateway, DynamoDB, S3, SQS, MSK, WAF), Kubernetes (EKS), Redis, Elasticsearch, Apache Kafka, RabbitMQ, Git, CI/CD, Docker, Devtron, Monitoring & Alerting Tools

EDUCATION

Bachelor of Technology (B.Tech.) — Computer Science & Engineering

Lovely Professional University | Graduation: January 2021
